Ms. Nelbha Iglesia
University of San Jose-Recoletos SDPC
Magallanes Sts., Cebu City, Cebu, Philippines

Dear Ms Nelbha Iglesia,

Good Day!

I am Lieudwig A. Abella, the group representative for Face It from the School of Computer Studies of the University of San Jose-Recoletos. Our capstone project *Face It*, is a desktop application that aims to aid psychotherapists/guidance counselors as a mitigating tool to help their clients overcome social anxiety as part of exposure therapy. This is through the means of controlled simulated scenarios that the user will have to undergo. With the help of facial recognition, the current emotional state of the user will be captured and will be used to adjust the simulated environment accordingly. The data collected would only be facial feature scores and the results from a standardized pretest and posttest for assessing social anxiety disorder. Participants will remain anonymous while using the application as the application does not require the user to provide any personal or sensitive information.

In line with this, we are hoping for guidance and assistance from your good office in recommending participants for the usability testing of our capstone project that will be conducted during the first semester of AY 2022-2023. We would like to request to place a computer unit with the game installed in the SPDC office at Basak Campus to allow full anonymity of the users, even to the developers.

We can be contacted through the email, lieudwig.abella.20@usjr.edu.ph or 09151634190. We look forward to collaborating with your office to promote and improve the well-being of the USJ-R students, especially in this time of pandemic.

Sincerely,

Lieudwig A. Abella
Group Representative

Noted By,

Mr. Vicente Patalita III
Group Advisor

Mr. Roderick Bandalan, MSIT
Chairperson, CS/IT

Dr. Joseph Cuizon
Dean, School of Computer Studies
